

AMAN SINGH

Data Analyst | SQL • Power BI • Python • Advanced Excel

+91 9161700888 | thakuraman0888@gmail.com | linkedin.com/in/YOUR-HANDLE | github.com/YOUR-HANDLE | Raebareli, Uttar Pradesh, India

PROFESSIONAL SUMMARY

Data Analyst with 1+ year of hands-on experience converting business requirements into SQL-driven analysis, automated reporting, and Power BI dashboards across product delivery and analytics teams. Proficient in SQL, Python (Pandas, NumPy), Advanced Excel, and Power BI (DAX, Power Query, data modeling), with practical exposure to ETL workflows, exploratory data analysis, and data quality validation. Automated recurring data preparation and reporting processes that reduced manual effort by 30%, and delivered KPI dashboards adopted by business, development, and QA stakeholders to support delivery decisions. Experienced in requirement gathering (BRD/FRD), stakeholder communication, and Agile delivery. B.E. in Computer Science, Chandigarh University (2026).

TECHNICAL SKILLS

Programming & Query Languages: SQL, Python, R (Basic), Java, C++

Data Analysis & Preparation: Pandas, NumPy, Advanced Excel (Pivot Tables, VLOOKUP/XLOOKUP, Power Query, Conditional Formatting), Data Cleaning, Data Wrangling, Data Transformation, ETL, Exploratory Data Analysis (EDA)

Business Intelligence & Visualization: Power BI (DAX, Power Query, Data Modeling, Star Schema), Streamlit, Matplotlib, Dashboard Design, KPI & MIS Reporting, Reporting Automation

Databases: MySQL, MongoDB, Joins, Subqueries, CTEs, Window Functions, Aggregations, Query Optimization

Statistics & Analytics: Descriptive Statistics, Trend Analysis, Correlation Analysis, Regression Analysis, Forecasting, Root Cause Analysis, Ad-hoc Analysis

Machine Learning: Scikit-learn, Linear Regression, Classification, Feature Engineering, Model Evaluation (Precision, Recall, F1, ROC-AUC)

Business Analysis: Requirement Gathering, BRD/FRD Documentation, Gap Analysis, Stakeholder Management, UAT Support, Data Quality Checks, Data Validation

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, MS Office, Agile/Scrum

Cloud & Other: AWS (Basic), Docker (Basic)

WORK EXPERIENCE

Business Analyst | Dinfoapp Services Pvt. Ltd. | Jan 2026 – Present

- Partnered with business stakeholders and product owners to elicit, document, and obtain sign-off on requirements in BRD and FRD format, reducing mid-sprint scope changes and downstream rework.
- Wrote and optimized SQL queries using joins, CTEs, aggregations, and window functions to validate transactional data and resolve recurring ad-hoc data requests from business teams within agreed turnaround times.
- Designed and published Power BI dashboards using DAX measures and Power Query transformations, consolidating fragmented manual Excel trackers into a single source of truth for KPI monitoring.
- Automated recurring MIS and KPI reporting through SQL extracts and Advanced Excel (Power Query, pivot tables, lookup functions), cutting report preparation time per cycle and eliminating repetitive manual consolidation.
- Performed data quality checks and root cause analysis on reporting discrepancies, improving accuracy and stakeholder confidence in published dashboards.
- Collaborated with development and QA teams through requirement walkthroughs, defect triage, and UAT validation, contributing to on-time, defect-reduced feature releases.
- Operated within an Agile delivery model, participating in sprint planning, daily stand-ups, and review ceremonies to align analytics deliverables with release timelines.

Data Science Intern | Infosys | Oct 2024 – Dec 2024

- Built an end-to-end Air Quality Index (AQI) analytics solution using Python (Pandas, NumPy), Streamlit, and Power BI, enabling interactive exploration of pollutant levels and seasonal trends.
- Automated data cleaning and preprocessing pipelines for large AQI datasets, reducing manual data preparation effort by 30% and improving dataset consistency for downstream analysis.

- Conducted exploratory data analysis (EDA) and trend analysis to surface pollution patterns and outliers, translating statistical findings into clear visual insights and recommendations.
- Presented dashboard outputs and analytical conclusions to project mentors, incorporating review feedback into subsequent iterations.

Business Development Associate | Navigrit | Feb 2025 – Jul 2025

- Managed the end-to-end client acquisition cycle including lead generation, discovery calls, follow-ups, and relationship management, developing consultative stakeholder communication skills applied directly to requirement gathering.
- Maintained lead pipeline and conversion data in Excel, producing weekly performance and funnel reports that informed outreach prioritization for the sales team.

PROJECTS

Financial Fraud Detection | Python, Pandas, Scikit-learn

- Analyzed a dataset of 1M+ financial transactions, applying data cleaning, feature engineering, and class-imbalance handling to identify behavioral fraud indicators.
- Trained and evaluated classification models achieving 91% accuracy, assessing performance using precision, recall, F1-score, and confusion matrix rather than accuracy alone.

AQI Analytics Dashboard | Python, Streamlit, Power BI

- Developed an interactive dashboard visualizing air quality trends with filterable views by location and time period, enabling non-technical users to self-serve insights without analyst intervention.

Student Score Prediction | Python, Scikit-learn, Streamlit

- Built a Linear Regression model to predict student performance and deployed it as a Streamlit web application, allowing users to generate on-demand predictions through a simple interface.

NLP Text Classification | Python, Hugging Face, BERT

- Fine-tuned a pre-trained BERT model for sentiment classification on labeled text data, benchmarking results against a baseline model to quantify accuracy gains.

CERTIFICATIONS

- Databases and SQL for Data Science with Python — IBM
- Introduction to Relational Databases (RDBMS) — IBM
- Data Visualization: Empowering Business with Effective Insights
- Basics of AWS Big Data Technologies (In Progress)

EDUCATION

Bachelor of Engineering, Computer Science | Chandigarh University, Mohali, Punjab | Aug 2022 – Jun 2026

Intermediate (Class XII) | Lucknow Public School, Raebareli, Uttar Pradesh | 2020

Matriculation (Class X) | Lucknow Public School, Raebareli, Uttar Pradesh | 2018
